

# ExxonMobil™ LDPE EVA Copolymers LD 363 Series

# Low Density Polyethylene Resin

## **Product Description**

ExxonMobil $^{\text{TM}}$  LDPE EVA Copolymer LD 363 series are LEVA LDPE grades, offering good optical and mechanical properties. Two additive combinations are available according to the required surface properties.

| General                       |   |           |   |                                     |                      |

## Legal Statement

Contact your ExxonMobil Chemical Customer Service Representative for potential food contact application compliance (e.g. FDA, EU, HPFB).

This product is not intended for use in medical applications and should not be used in any such applications.

# **Processing Statement**

The test specimen were prepared on LD 363BW,  $30\mu m$  (1.18mil) thick film, using a 200 mm (7.9 in) die, die gap of 1.0 mm (39.4 mil), Blow-Up Ratio of 2.5 and temperature profile of 170 -  $180^{\circ}$ C (338 -  $356^{\circ}$ F).

#### Notes

Typical properties: these are not to be construed as specifications.

Effective Date: 07/26/2022 ExxonMobil Page: 1 of 2
